

# Nutrition Facts Labelling

Canadian and US (NLEA) Nutrition panels, and restaurant information sheets can be generated using the following tools:

- Laboratory analysis for all required nutrients
- Laboratory analysis for optional nutrients
- Database and/or targeted lab testing Combinations

## Laboratory Nutritional Testing

- Our food analysis labs can test for all mandatory nutrients
- Our labs can also test for the following nutrients that may be voluntarily declared:

**Vitamins:** B1 (Thiamin), B2 (Riboflavin), B3 (Niacin), B5 (Pantothenic Acid), B6 (Pyroxidine), B9 (Folic Acid), B12 (Cyanocobalimin), D, E (Tocopherol), Biotin (B7 or H), K

**Minerals:** Copper, Magnesium, Manganese, Phosphorus, Potassium, Selenium, Zinc

**Mono- and Poly- unsaturates,** including Omega fats

**Starch, sugar alcohols, soluble/insoluble fiber**

## Nutritional Database calculations

- Cost effective option for food manufacturers or restaurants, particularly those with dozens or hundreds of products to characterize.

## Other Nutritional Labeling Services

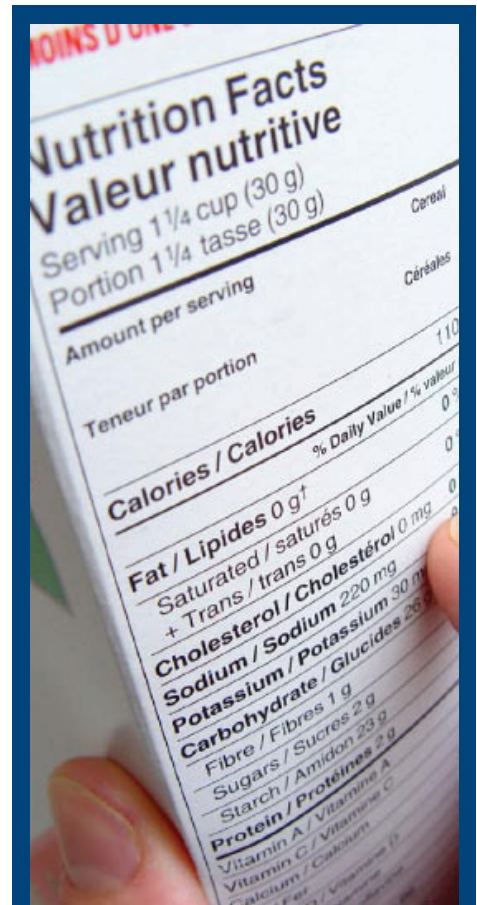

- Custom Packages: Database + targeted lab analysis (for moisture, sodium, trans fats, etc. as appropriate), or reduced label testing for specific kinds of products (for example, omitting sugar, fiber and vitamins from meat product testing)

Bodycote Testing Group can help you determine, in a cost effective manner, the best combination of testing for Nutrition Labeling of your products.
